

Alberts Bredikis

Łódź, Poland · bredikisalberts@gmail.com · +48 604 897 799 · [LinkedIn](#) · [GitHub](#)

Front-End developer specializing in React, with a strong focus on code quality and long-term maintainability. I deliver high-impact features and provide reliable technical leadership.

Experience

Front-End developer · [Mapon](#)

August 2024 – Present

- Led architecture and implementation of global state and routing for the [Task & Route Planning solution](#), providing a maintainable & scalable foundation for ongoing feature development.
- Implemented dynamic UI features and real-time updates, including drag-and-drop reordering and WebSocket-based data synchronization, ensuring dynamic workflows and live data updates.
- Led front-end Mixpanel integration used by ~20 developers, collaborating with data analysts to standardize event-tracking practices and creating documentation to ensure accurate, consistent analytics.
- Mentored a new developer over 3 months with workshops and onboarding support.
- Maintained and refactored legacy code, optimized performance, conducted code reviews, and implemented new features in existing solutions.
- Delivered Shadow Day technical presentations to educate students on front-end/back-end collaboration and workflows.

Full Stack developer · [Freelance](#)

August 2023 – August 2024

- Managed projects independently, coordinating timelines, deliverables, and client communication.
- Delivered 4 fully responsive, client-focused web applications, meeting design specifications and business objectives.
- New solutions increased organic traffic by ~30% across projects.

Mid WordPress developer · [Civitta](#)

May 2022 – August 2023

- Developed and launched websites for financial institutions and other industries, resulting in an ~20% increase in conversion rates and ~15% improvement in search rankings.
- Promoted WordPress and web development best practices, emphasizing DRY coding resulting in improved web vitals and enhanced HTML semantics.

Junior WordPress developer · [Bright](#)

September 2020 – May 2022

- Developed pixel-perfect WordPress themes for 5 websites based on detailed design specifications.
- Created a CLI-based WordPress setup generator, reducing new project initialization time by ~20 minutes.
